LeetCode: <https://leetcode.com/u/suleman3222/>

PROFESSIONAL SUMMARY

I build backends that stay fast when things get messy. My daily toolkit centers on Java 21 and Spring Boot 3—wiring up microservices, normalizing databases into clean 3NF structures, and locking down endpoints with role-based JWT. When real-time communication is critical, I lean on WebSockets and Redis to keep latency near zero. Clean object-oriented code matters to me. So does algorithmic efficiency. If an API drags or a query bottlenecks, I dig until it runs smooth.

TECHNICAL SKILLS

Languages: Java (Core & Advanced, Multithreading, Streams API, Collections), Python, SQL, JavaScript

Backend & Frameworks: Spring Boot 3, Spring Data JPA, Hibernate, Spring Security, RESTful APIs, WebSockets, Lombok

Databases & Caching: MySQL, Redis, TiDB Cloud (AWS), JDBC

Frontend & UI: React.js, HTML5, CSS3, Bootstrap, Responsive Web Design

Tools & Platforms: Docker, Git, GitHub, Maven, Postman, IntelliJ IDEA

Core Competencies: Data Structures & Algorithms (DSA), OOP, Microservices Architecture, JWT Auth

WORK EXPERIENCE

Java Developer (Intern) — IndoLike

Feb 2025 – Mar 2025 | Remote

Live App: <https://chatapp-0glv.onrender.com/>

- Built a live messaging system from the ground up using **Java 21, Spring Boot 3, and WebSocket (STOMP)**. Handled 500+ active connections at once without a hitch, knocking 30% off message delivery delays.
- Routed chat history through an in-memory **Redis** cache using `opsForList`. Disk reads were choking the database; this shift bypassed MySQL I/O bottlenecks and cut query response times by ~30%.
- Wrote clean REST endpoints for user authentication and messaging, reliably taking on 10,000+ daily hits. Verified connection stability and zero packet drops under stress with Apache JMeter.

FEATURED PROJECTS

Campus Recruitment & Placement Management System

React.js, Spring Boot 3, Java 21, MySQL, Docker, JWT

Live Demo: <https://campus-recruitment-system-five.vercel.app/>

- Built an all-in-one hiring portal to take the friction out of campus placements for colleges, company recruiters, and student applicants.
- Kept authentication airtight. Implemented role-based access control (RBAC) via **Spring Security**, signing and validating stateless **JWT tokens** across every protected route.
- Structured relational data into strict 3NF tables using Spring Data JPA and Hibernate against cloud MySQL (TiDB), ensuring atomic ACID guarantees when hundreds applied simultaneously.
- Wired the Spring Boot APIs into a responsive React frontend, and bundled the backend into lean multi-stage **Docker** containers ready for deployment on Render.

E-Commerce Web Application

Java 21, Spring Boot 3, Spring Data JPA, MySQL, Lombok, HTML5/CSS3

GitHub Repo: <https://github.com/suleman2212/ecommerce>

- Developed a complete online shopping platform split into two clear worlds: an administrative management portal and a consumer storefront.
- Built the admin console with full CRUD controls to add items, modify prices, and restock inventory directly in MySQL.
- Handled shopping carts and checkouts through clean JPA relationships (`@OneToMany`, `@ManyToOne`) connecting Users, Products, Orders, and OrderItems.
- Made inventory updates atomic. Quantities decrement automatically as soon as an order clears, while **Lombok** keeps entity models tidy and free of boilerplate.

EDUCATION & CERTIFICATIONS

B.Tech in Artificial Intelligence & Machine Learning

Expected: 2026

Sri Venkateswara College of Engineering and Technology, Chittoor, AP

Certification: Java Full Stack Development — Tata Strive (2026)

ACHIEVEMENTS

- **Competitive Programming:** Solved 50+ Data Structures & Algorithms challenges on LeetCode: <https://leetcode.com/u/suleman3222/> using Java.
- **Strategic Leadership:** Took 1st place in the college chess championship at Selesta Fest, SVCET.
